

A-SUB TECHNICAL DATA SHEET

Description

A-SUB Alcohol Substitute provides an ideal balance between the viscosity and wetting required to replace alcohol in your fountain solution system. A-SUB is a low dosage formula making it an efficient way to reduce surface tension and piling in your water system, while allowing you to keep your settings at a minimum.

Application Information

Safety First - Review Safety Data Sheet (SDS) and secure proper Personal Safety and Protective Gear.

Directions for Use:

The recommended dosage range for A-SUB is 2 oz. to 4 oz. per gallon of mixed fountain solution. Recommended starting dosage is 2 oz. per mixed gallon and to increase by ½ ounce per gallon until desired print quality is obtained.

Typical Properties of A-SUB

VOC = 2.05 lb/gal (246 grams/liter)

Color = Clear/Colorless

Flash Point = >160F

Odor = Mild

Advantages and Benefits

- Low VOC (500 grams/liter or Less)
- Low dosage formula
- For use with sheet-fed and web fountain solutions
- Reduces ink feedback and piling
- Allows you to keep your water settings at a minimum

Packaging

A-SUB is available in quantities of 1 gallon, 5 gallons and 55 gallons.
